

APRILIA SHIVER 750 (2010)

SLIP-ON STREET LEGAL EXHAUST SYSTEM

APRILIA SHIVER 750 (2010)

SLIP-ON STREET LEGAL EXHAUST SYSTEM

DESCRIPTION

Our sporty and lightweight SLIP-ON systems offer a great balance between price and performance and represent the first step in the exhaust system tuning process. The change will be also visual as our mufflers with carbon-fiber end cap perfectly fit the exterior line of the sporty Shiver 750 and add a clean racing image. The muffler outer sleeve is made of titanium or carbon-fiber, which gives a special hi-tech touch to our SLIP-ON system. We offer street legal version with removable noise damping muffler inserts.

PERFORMANCE

Measurements of the Akrapovic SLIP-ON system on the APRILIA SHIVER 750 (with muffler insert):

Power & Torque: the exhaust system modification results in a major boost in performance, delivering a solid 81.2 HP at 9250 rpm on back wheel. But the increased power isn't available just at the top of the range; the system shows its quality already from 3500 rpm up through entire rpm range. Max. increased power between the Akrapovic and the stock system is 3.4 HP at 9250 rpm. Besides this, the torque is substantially higher in a lower rpm area from 3800 rpm to 6000.

PERFORMANCE			
	stock	AKRAPOVIC	max. increased power
max. rear wheel power HP / rpm (measured on SuperFlow Cycle Dyn)	77.8 / 9250	81.2 / 9250	3.4 / 9250

ADDITIONAL DATA
