

## Slip-On Line MBK

The Slip-On is the first stage in transforming your exhaust system. In addition to increasing your power, the Akrapovič Slip-On system gives your scooter a distinctive deeper sound and also changes its visual appearance. Even from afar you can see and hear that this is no mass-produced system. This system was developed based on rich experience and the result is a product that suits a scooter perfectly. Installation is a snap. Adding the optional catalytic converter makes the Slip-On exhaust system EC Type approved. Please note that exhaust system cannot be used for ABS Version.

The Akrapovič Racing exhaust system increases your engine power and its torque at practically every rpm.
