Installation instructions:

AKRAPOVIC RACING & EVOLUTION EXHAUST SYSTEM

for the YAMAHA YZ 250F (2006-2009), WR250F (2007-)

Congratulations on purchasing an Akrapovic exhaust system. Please read these installation instructions carefully. If you have any trouble installing the system please contact your authorized dealer!

IMPORTANT INFORMATION

Exclusion of Certain Liability

- The manufacturer, importer or dealer shall not be liable for any incidental damage including personal injury or any
 other damages caused by improper installation or operation of the Akrapovic exhaust system. When installing the
 Akrapovic exhaust system be careful that the exhaust system does not touch other parts sensitive to high
 temperature.
- Akrapovic makes no representation or warranties with regard to damage caused by the improper installation, use and
 maintenance of the Akrapovic exhaust system. The warranty is limited to defects recognized by our technical
 department and to normal use, and excludes items subject to normal wear (gaskets and damping wool). The
 guarantee is void in case of accident, modification, improper or competition use.
- 3. Do not attempt to install the Akrapovic exhaust system on a motorcycle for which it was not made or tested by Akrapovic.
- 4. When the exhaust system gets very hot during operation, be careful not to burn yourself on the exhaust system or parts which are in direct contact with it, even when the motor is not running. Also protect other people, especially children, from the injuries mentioned above.
- In some cases Akrapovic exhaust system kits contain chemical products (ceramic anti-seizing grease; bolt sealant).
 Handle with care, do not inhale or swallow. Avoid excessive contact with skin, eyes or mucous membranes. Keep out of reach of children
- 6. Technical specifications of Akrapovic exhaust systems and related products subject to change without notice.

Symbols

The following symbols are used throughout these installation instructions:

USE BOLT SEALANT; Apply 3 to 4 small drops of bolt sealant onto the cleaned and degreased threads before tightening bolts. WARNING! Avoid contact with skin, eyes and mucous membranes. Do not inhale fumes. Keep out of the reach of children.

USE ANTI-SEIZING GREASE (white tube); Prevents seizing, corrosion and excessive wear between the titanium components of your exhaust system. WARNING! Avoid eye contact. Avoid excessive skin contact. Keep out of the reach of children.

USE ANTI-SEIZE LEAD-FREE COPPER PASTE (black tube); Provides trouble-free and long-lasting protection against seizing, corrosion and rusting of bolts, threaded ends, nuts, joints, etc. Also protects against vibration, wear and impact. **WARNING! Avoid eye contact. Avoid excessive skin contact. Keep out of the reach of children.**

INSTALLATION INSTRUCTIONS

Z

BEFORE INSTALLING CHECK SCHEMATIC OF THE EXHAUST SYSTEM!

- I F ANY ITEMS IN THE AKRAPOVIC EXHAUST SYSTEM PACKAGE ARE MISSING PLEASE CONTACT YOUR AUTHORIZED DEALER. KEEP THE SCHEMATIC FOR FUTURE REFERENCE.
- ! THESE INSTALLATION INSTRUCTIONS MUST BE READ CAREFULLY IN ORDER TO ENSURE PROPER INSTALLATION AND OPERATION OF THE AKRAPOVIC EXHAUST SYSTEM.
- ! THE EXHAUST SYSTEM CAN BE EXTREMELY HOT. ALLOW THE MOTORCYCLE TO COOL DOWN BEFORE BEGINNING INSTALLATION.
- Z

WE ADVISE YOU TO LEAVE INSTALLATION TO A QUALIFIED SERVICEMAN. IMPROPER INSTALLATION MAY RESULT IN A SHORTER LIFETIME OF THE EXHAUST SYSTEM AND/OR DAMAGE TO THE MOTORCYCLE.

- T-handle 8mm wrench
- T-handle 10mm wrench
- T-handle 12mm wrench
- T-handle 13mm wrench
- T-handle 5mm three hexagon key wrench
- T-handle 6mm three hexagon key wrench
- Spring puller

REMOVAL OF STOCK EXHAUST SYSTEM

- 1. Put the motorcycle on a side stand, we recommend a racing stand.
- 2. For easier access to the muffler remove the rear right panel (Figure 1, 2).

Figure 1

Figure 2

3. Untighten the bolt from the metal clamp at the link pipe – header tube joint and unscrew the bolt from the link pipe bracket (Figure 3, 4).

Figure 3

Figure 4

4. Unscrew and remove the bolt from the muffler bracket and remove the muffler (Figure 5, 6).

Figure 5 Figure 6

5. Unscrew and remove the nuts on the header tube flange and remove the stock header tube (Figure 7, 8).

Figure 7 Figure 8

INSTALLATION OF THE AKRAPOVIC RACING OR EVOLUTION EXHAUST SYSTEM

1. Set up the inner sleeve together with the flange and springs; make sure they are correctly oriented; use stock gasket and hand tighten the flange (Figure 9, 10).

Figure 9 Figure 10

 For optional Akrapovic carbon-fiber heat shield: Correctly position and install the optional Akrapovic carbon-fiber or stock heat shield onto the header tube; make sure the heat / distance washers are correctly installed (Figure 11, 12, 13).

Figure 11 Figure 12

Figure 13

3. Install the header tube and attach the springs (Figure 14, 15). WARNING! make sure, that springs pull the header all the way into the inner sleeve – use rubber mallet if necessary to tap the connection into place!

Figure 15

Correctly position the carbon-fiber clamp and slide it onto the muffler - bear in mind the left offset of the carbon-fiber clamp viewed from the rear. WARNING! open the clamp slightly wider than the diameter of the outer sleeve of the muffler – do not scrape it along the muffler outer sleeve! (Figure 16).

Figure 16

Correctly position the muffler and slide it onto the header tube (Figure 17). For Evolution exhaust only: coat the interior side of the input of the titanium link pipe with Akrapovic ceramic anti-seizing grease (white tube).

Figure 17

Hand tighten the bolt of the link pipe hanging bracket and attach the spring at the link pipe – header tube joint (Figure 18, 19). WARNING! make sure, that spring pull the link pipe all the way onto the header—use rubber mallet if necessary to tap the connections into place!

7. Install the aluminium collars and rubber dampers supplied in the Akrapovic kit on to the muffler clamp correctly (Figure 20, 21). Attach the carbon-fiber clamp to the stock chassis hanging bracket – use the stock bolt and washer. Do not fully tighten. Make sure the additional parts from the Akrapovic kit are correctly installed. Make sure the link pipe and header tube are not touching the engine or frame (Figure 22).

Figure 20 Figure 21

Figure 22

8. Tighten fully the bolts of the muffler clamp, link pipe bracket and nuts of the header tube flange (Figure 23, 24, 25).

Figure 23 Figure 24

Figure 25

9. Reattach the rear panel (Figure 26, 27).

Figure 26

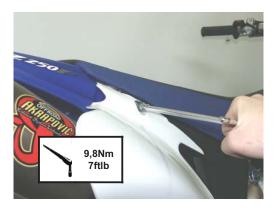

Figure 27

Final installation:

- 1. Clean grease spots:
 - a. Muffler titanium outer sleeve: use a soft cloth sprayed with a multi-purpose spray lubricant (WD-40 or equivalent).
 - b. RACING stainless steel link pipe, header tube: use a soft cloth sprayed with a contact cleaner, then wipe with a soft dry cloth.
 - EVOLUTION titanium link pipe, header tube: use a soft cloth sprayed with a multi-purpose spray lubricant (WD-40 or equivalent).

Cleaning will prevent spots from burning onto the surface. Do not use aggressive chemical cleaners, because they can damage the sticker.

WARNING: in case of installing optional carbon-fiber heat shield: after running engine for 30 minutes, tighten the bolts on the Akrapovic carbon-fiber heat shield!

Figure 28

Figure 29

Figure 30

Figure 31

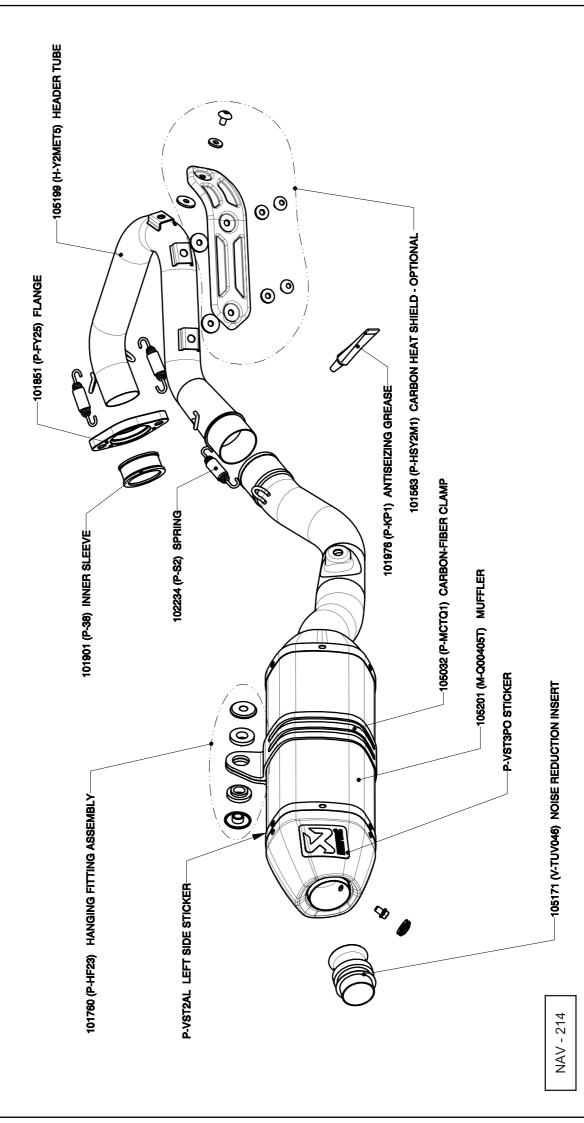

- 4. Check the operation of the brakes and suspension. Make sure all the bolts are sufficiently tightened. In case the exhaust system touches the cowling or other parts repeat the adjustment of the exhaust system or contact your authorized dealer.
- I IT IS NORMAL IF WHITE SMOKE COMES OUT OF THE MUFFLER ON FIRST OPERATION.
- ! DO NOT STAND BEHIND THE MUFFLER ON FIRST OPERATION.
- DO NOT USE AUTOMOTIVE WHEEL CLEANERS OR ANY CLEANING PRODUCTS WHICH CONTAIN ACIDIC ADDITIVES TO CLEAN AKRAPOVIC EXHAUST SYSTEMS.

MAINTENANCE OF THE AKRAPOVIC EXHAUST SYSTEM

- Clean the titanium exhaust components with a multi-purpose spray lubricant (WD-40 or equivalent), carbon fiber exhaust
 components with soft and dry cloth and stainless steel components with soft cloth sprayed with contact cleaner, then wipe
 with soft and dry cloth. Do not use aggressive chemical cleaners, because they can damage the sticker. A change in the
 color of the exhaust system is normal due to the high temperatures.
- 2. The wearing out of the muffler silencing material depends on the type of the motor and riding style. Contact your dealer/serviceman if visible changes appear on muffler's outer sleeve or the noise level is increased.
- 3. Periodically make sure all the bolts and springs are sufficiently tight.
