👁 Note!

Please note that this image is a general representation of the product and may differ slightly from your product.

👁 Note!

Please note that during storage and transportation, especially at high ambient temperature, some of the oil and grease used for assembling may leak and stain the packaging. This is in no way detrimental to the product, wipe off the excessive oil/grease with a cloth.

⚠ Warning!

Before installing this product, read the Öhlins Owner's Manual. The shock absorber/front fork/steering damper is an important part of your vehicle and will affect the stability.

👁 Öhlins products are subject to continuous improvement and development, therefore, although these instructions include the most up-to-date information available at the time of printing, minor updates may occur.

To find the latest information contact an Öhlins distributor. Please contact Öhlins if you have any questions regarding the contents in this document.

MOUNTING INSTRUCTIONS

⚠ Warning!

It is advisable to have an Öhlins dealer install the shock absorber/front fork/steering damper.

⚠ Warning!

If working on a raised vehicle, ensure it is securely supported so that it will not tip.

👁 Note!

Before mounting this product clean the vehicle thoroughly.

👁 Note!

When working on this product, always see the Vehicle Service Manual for vehicle specific procedures and important data.

1
Put the motorcycle on a workstand so that the rear wheel barely touches the ground.

2
Remove the seat.

3
Remove the plastic cover on the upper attachment of the original shock absorber. Cut the tie raps around the wiring harnesses. Reattach the harnesses with the new tie raps provided in this kit.

4
Carefully loosen the electrical connector from the plastic cover. Use a small screw driver on the lower side from the rear to release the snap lock and slide the connector forward.

5
Loosen the chain guide on the swing arm for better access to the lower attachment of the shock absorber.

6
Remove the attachments and remove the original shock absorber.

7
Install the Öhlins shock absorber in the same way as the original unit. The preload adjuster shall point towards the rear of the vehicle.

8
Install the attachment screws. Replace the upper screw with the screw provided in this kit. Do not tighten yet.

9
Install the reservoir to the frame with the mount rubbers and hose clamps provided in this kit.

👁 Note!

Lower the vehicle so that the suspension is slightly compressed before tightening the screws.

10
Tighten the attachment screws according to the vehicle specs.

11
Reinstall the chain guide, plastic cover, electrical connector and the seat. Make sure that all removed parts are reinstalled in the same way as they were before the installation.

👉 Caution!

Ensure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber/front fork/steering damper when the suspension is fully compressed or extended.
