# Öhlins shock absorber 46 HRCLS

Your Öhlins shock absorber type 46 HRCLS features the following adjusters:

#### Compression damping adjuster

Adjustments are made on top of the reservoir.

#### Rebound damping adjuster

Adjuster wheel on the piston shaft above the end bracket.

#### Spring preload adjuster

Adjustments are made by turning the knob on the hydraulic adjuster. Clockwise for harder adjustment, counter clockwise too release the preload.

#### Length adjuster

Adjustment is made by turning the end eye and tightening with the lock nut.

#### NOTE!

When delivered the Öhlins shock absorber is dialed to recommended settings for the specific brand and make of the motorcycle. If you have changed the setting check like this:

The adjusters have a normal right hand thread. Turn the damping adjusters clockwise to fully closed (pos. zero [0]). Turn counter clockwise to open and count the clicks until you reach the recommended number of clicks. See Setup data at last page.

## CAUTION!

Do not use to much force, delicate sealing surfaces can be damaged.

#### Safety signals

Important information concerning safety is distinguished in this manual by the following notations:

# A

The Safety alert symbol means: Caution! Your safety is involved.

# A WARNING!

Failure to follow warning instructions could result in severe or fatal injury to anyone working with, inspecting or using the suspension, or to bystanders.

### CAUTION!

Caution indicates that special precautions must be taken to avoid damage to the suspension.

#### NOTE!

This indicates information that is of importance with regard to procedures.

### Before installation

Öhlins Racing AB can not be held responsible for any damage whatsoever to shock absorber or vehicle, or injury to persons, if the instructions for fitting and maintenance are not followed exactly. Similarly, the warranty will become null and void

if the instructions are not adhered to.

# A WARNING!

1. Installing a shock absorber, that is not approved by the vehicle manufacturer, may affect the stability of your vehicle. Öhlins Racing AB cannot be held responsible for any personal injury or damage whatsoever that may occur after fitting the shock absorber. Contact an Öhlins dealer or other qualified person for advice.

2. Please study and make certain that you fully understand all the mounting instructions and the owners manuals before handling this shock absorber kit. If you have any questions regarding proper installation procedures, contact an Öhlins dealer or other qualified person.

3. The vehicle service manual must be referred to when installing the Öhlins shock absorber

Öhlins products are subject to continual improvement and development. Consequently, although these instructions include the most up-to-date information available at the time of printing, there may be minor differences between your suspension and this manual. Please consult your Öhlins dealer if you have any questions with regard to the contents of the manual.

#### NOTE!

During storage and transportation, especially at high ambient temperature, the oil and grease used for assembling may run out inside the packing and damage the expanded polystyrene packing material. This is not unusual and is in no way detrimental to the shock absorber.

#### Kit contents

Before installing the shock absorber, please check the contents of the kit. If anything is missing, contact your Öhlins dealer.

### Mounting instructions

## 1

Put the motorcycle on a stand so the rear wheel is clear of the ground. The swing arm must be free, so the suspension is unloaded. Make sure it's steadily fixed so it will not fall over.

# A WARNING!

1. It's advisable to have an Öhlins dealer or other qualified person to fit your shock absorber. 2. Instructions in the vehicle service manual are to be followed when changing the shock absorber.

3. When working on a lifted vehicle it must be securely supported to prevent it from falling.

2

Loosen and remove the seat. Remove all fairings on the right side.

#### 3

Loosen and remove the original spring pre-load adjuster, located on the right side.

Loosen the hose located under the seat.

Loosen the cooler liquid expansion chamber.

#### 6

Remove the tool box.

## 7

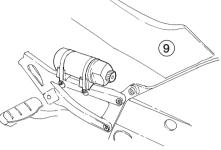

Loosen first the lower shock absorber bracket, then the upper and take the original shock absorber out downvards.

### 8

Mount the Öhlins shock absorber in reverse order, first the upper attachment then the lower one.

### 9

Fit the gas reservoir with the two rubber mounts and the hose clamps.

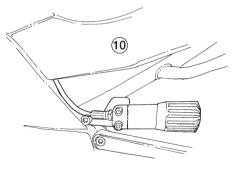

### NOTE!

The reservoir should be mounted with the banio bolt towards the wheel.

# 10

Fit the new prespanner adjuster. Let the hose go in soft turns and fix it with tie raps.

#### 11

Refit the expansion chamber, the tool box, the fairings and the seat.

#### NOTE!

Make sure that all bolts are tightened to the correct torgue and that nothing fouls or restricts movement of the shock absorber when the suspension is being fully compressed or extended.

## 12

Continue your work according to owners manual.
