⚠ Warning!

It is advisable to have an Öhlins dealer install the shock absorber.

When installing, read the Vehicle Service Manual.

1

Put the motorcycle on a workstand so that the rear wheel barely touches the ground. The swing arm must be free so that the suspension is unloaded.

⚠ Warning!

Make sure the vehicle is securely supported so that it will not tip.

👁 Note!

Before installing the Öhlins shock absorber clean the vehicle thoroughly.

2

Remove the seats and the side covers.

3

Remove the adjustment wheel of the hydraulic preload adjuster.

NOTE!

The indicator steel ball inside the hydraulic preload adjuster may fall out when the adjustment wheel is removed. Make sure you do not lose the steel ball when removing the adjuster.

4

Loosen the lower attachment of the original shock absorber.

5

Loosen the triangle link and remove it.

NOTE!

We recommend you to loosen the lower bolt of the triangle link last, angle it slightly upward to be able to remove the last bolt without interfering with the exhaust pipe.

Figure: Triangle link

**6**

Loosen the clamp that holds the hose of the original shock absorber, and remove the hose. Loosen the upper attachment of the shock absorber and lift the rear wheel slightly to be able to remove the shock absorber downwards.

7

To be able to fit the Öhlins shock absorber you may have to lift the battery box slightly, unscrew the 2 screws, lift the battery box slightly and put a screwdriver or other tool from each side to hold the battery box up while you install the Öhlins shock absorber.

8

Fit the Öhlins shock absorber by positioning it from underneath, fit the upper bracket.

9

Reassemble the triangle link and fit the lower attachment of the shock absorber.

👁 Note!

Lower the motorcycle so that the shock absorber is slightly compressed, before tightening the screws.

10

Make sure that all removed parts are reinstalled in the same way as they were before the installation.

👁 Caution!

Make sure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber when the suspension is fully compressed or extended.
