Mounting instructions Öhlins shock absorber kit HO 201 for Honda CB 900 F Hornet

Öhlins shock absorber 46 HRCS

Your Öhlins shock absorber type 46 HRCS features the following adjusters:

Compression damping adjuster

Adjustments are made on top of the reservoir.

Rebound damping adjuster

Adjuster wheel on the piston shaft above the end bracket.

Spring preload adjuster

Adjustments are made by turning the knob on the hydraulic adjuster. Clockwise for harder adjustment, counter clockwise too release the preload.

NOTE!

When delivered the Öhlins shock absorber is dialed to recommended settings for the specific brand and make of the motorcycle. If you have changed the setting check like this:

The adjusters have a normal right hand thread. Turn the damping adjusters clockwise to fully closed (pos. zero [0]). Turn counter clockwise to open and count the clicks until you reach the recommended number of clicks. See Setup data at last page.

CAUTION!

Do not use to much force, delicate sealing surfaces can be damaged.

Safety signals

Important information concerning safety is distinguished in this manual by the following notations:

The Safety alert symbol means: Caution! Your safety is involved.

Failure to follow warning instructions could result in **severe or fatal injury** to anyone working with, inspecting or using the suspension, or to bystanders.

CAUTION!

Caution indicates that special precautions must be taken to avoid damage to the suspension.

NOTE!

This indicates information that is of importance with regard to procedures.

Before installation

Öhlins Racing AB can not be held responsible for any damage whatsoever to shock absorber or vehicle, or injury to persons, if the instructions for fitting and maintenance are not followed exactly.

Similarly, the warranty will become null and void if the instructions are not adhered to.

A WARNING!

- 1. Installing a shock absorber, that is not approved by the vehicle manufacturer, may affect the stability of your vehicle. Öhlins Racing AB cannot be held responsible for any personal injury or damage whatsoever that may occur after fitting the shock absorber. Contact an Öhlins dealer or other qualified person for advice.
- Please study and make certain that you fully understand all the mounting instructions and the owners manuals before handling this shock absorber kit. If you have any questions regarding proper installation procedures, contact an Öhlins dealer or other qualified person.
- 3. The vehicle service manual must be referred to when installing the Öhlins shock absorber

Öhlins products are subject to continual improvement and development. Consequently, although these instructions include the most up-to-date information available at the time of printing, there may be minor differences between your suspension and this manual. Please consult your Öhlins dealer if you have any questions with regard to the contents of the manual.

NOTE!

During storage and transportation, especially at high ambient temperature, the oil and grease used for assembling may run out inside the packing and damage the expanded polystyrene packing material. This is not unusual and is in no way detrimental to the shock absorber.

Kit contents

Before installing the shock absorber, please check the contents of the kit. If anything is missing, contact your Öhlins dealer.

Owners manual	-1	

Mounting instructions

1

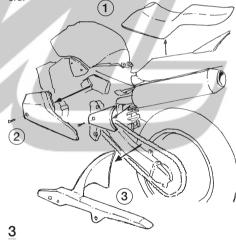

Put the motorcycle on a stand so the rear wheel is clear of the ground. Make sure it's steadily fixed so it will not fall over.

A WARNING!

- 1. It's advisable to have an Öhlins dealer or other qualified person to fit your shock absorber.
- Instructions in the vehicle service manual are to be followed when changing the shock absorber.
- 3. When working on a lifted vehicle it must be securely supported to prevent it from falling.

2

Remove the seat and the left and right side covers

Remove the seat and the left and right side covers.

4

Remove the left heat shield of the silencer.

-5

Loosen the original gas reservoir from its mount.

6

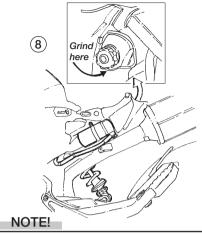

Remove the lower and upper shock absorber mounting bolts.

7

Lift the rear frame enough to make removal of the shock absorber rearwards possible.

8

Attach the Öhlins shock absorber in reverse order. The reservoir is to be located to the left side in the original attachment.

It might be necessary to modify the attachment slightly by grinding the rear edge so the adjuster wheel not will be in contact with the edge.

9

The hydraulic pre-load adjuster should be pulled out to the right side of the motorcycle.

10

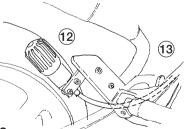

Mount the upper and lower shock absorber bolts.

11

Fix the reservoir with the circle clamp supplied.

12

Attach the pre load adjuster to the rear foot rest bracket on the right side of the motorcycle.

13

Fix the adjuster and let the hose go in soft turns to the spring pre loader. Fix the hose with tie-raps.
