Kit contents

Before installing the shock absorber, please check the contents of the kit, listed on the front page of this instruction. If anything is missing, contact your Öhlins dealer.

NOTE!

During storage and transportation, especially at high ambient temperature, the oil and grease used for assembling may run out inside the packing and damage the expanded polystyrene packing material. This is not unusual and is in no way detrimental to the shock absorber.

Mounting Instructions

1

Put the motorcycle on a stand so that the rear wheel does not touch the ground.

WARNING!

*1. It's advisable to have an Öhlins dealer or other qualified person to fit your shock absorber.
2. Instructions in the vehicle service manual are to be followed when changing the shock absorber.
3. When working on a lifted vehicle it must be securely supported to prevent it from falling.*

2

Remove the seat and the side covers.

3

Remove the battery box and bracket holding battery box.

4

Remove the lower drag link bolt and the lower shock absorber bolt.

5

Loosen the reservoir of the original damper, remove the damper bolt and the damper unit downwards. (Lift rear wheel)

Mounting of the new Öhlin shock will start by pulling reservoir and the damper itself upwards and the reservoir out on the left side of the bike. Mount the upper shock absorber bolt. (When mounting lift the rear wheel)

7

Mount bracket to the battery box. **N.B!** This bracket **must** be placed higher up than original, in it's lower mounting holes. Also remove rubber from battery box before mounting. All this to make clearance between bonjo bolt and battery box/braket.

Mount battery box and battery.

9

Lift the rear wheel again and mount the shock absorber bolt and the bolt to the linkage.

10

Mount the reservoir using mounting rubbers and hose clamp (see figure).

11

Make sure that all the bolts are tightened.

12

Mount the side covers and seat.

NOTE!

Make sure that all bolts are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber when the suspension is being fully compressed or extended.

WARNING!

Certain modifications may be necessary when installing the Öhlins shock absorber/suspension. It is essential that the mounting instructions are carefully followed.
